SUMMARY

Informatics Engineering graduate with 10 months of software engineering internship experience in banking (Bank Riau Kepri Syariah). Experienced in building internal web applications with JavaScript, React, Node.js/Express, and MySQL, from translating user requirements and development to UAT and technical documentation. Built an ETL pipeline processing ~1M ATM transactions in ~2 minutes. Seeking a Junior Application Developer role.

EDUCATION

Bachelor of Applied Computer Engineering (Teknik Informatika) | Politeknik Caltex Riau *2022 – 2026*
GPA: 3.41 / 4.00 | Focus: software development and web-based application development
SMAN Plus Provinsi Riau | Science Program *2019 – 2022*

SKILLS

Web Frontend: JavaScript, React.js, HTML, CSS, Tailwind CSS, Bootstrap, Ant Design, ReactFlow, Vite
Web Backend: Node.js/Express, REST API, JWT Authentication, Sequelize, Spring Boot (Java), JPA/Hibernate, Laravel (PHP), FastAPI, Django
Data & Automation: Python, SQL, Pandas, OpenPyXL, ETL Pipelines, Selenium, ECharts, Chart.js
Machine Learning & NLP: XGBoost, Hugging Face Transformers (IndoBART), Sastrawi, ROUGE Evaluation
Database: MySQL
Mobile & Design: Kotlin/Android (academic prototype), Figma
Tools & Documentation: Git, GitHub, VS Code, Functional Specification Documents (FSD), technical documentation, black-box & UAT testing

PROFESSIONAL EXPERIENCE

Software Engineering Intern | Bank Riau Kepri Syariah *Mar 2026 – Jul 2026*
Full-Stack, Data & ML

- Built a Bank Transaction Monitoring System with an automated ETL pipeline processing ~1 million ATM transactions in ~2 minutes, interactive KPI dashboards, and Excel/PDF reporting for internal bank users; secured with JWT authentication and role-based access control using React, Node.js/Express, and MySQL.
- Developed an ATM cash-prediction and analysis dashboard for 379 ATMs across 4 cities, integrating an XGBoost model through FastAPI; the model achieved MAE of 7.17 hours and R^2 of 0.9173 to support cash-replenishment planning.
- Built internal web applications (ATM First Line Maintenance and SOP Knowledge Base) based on requirements from the Operational and Accounting Division, featuring incident management, task tracking, analytics, ReactFlow decision-tree visualization, and reporting.
- Automated ATM monitoring and claim data-entry workflows using Python, Selenium, and FastAPI. The system automatically accessed REKAN ATM, downloaded monitoring data, filtered data by region, and distributed the results to the corresponding WhatsApp groups, significantly reducing manual processing time.
- Presented system demos and supported UAT, deployment, and troubleshooting of solutions used by internal bank divisions.

Software Engineering Intern | Bank Riau Kepri Syariah *Sep 2025 – Jan 2026*
Full-Stack & Documentation

- Built an IT Project Timeline Monitoring System (React, Java 17, Spring Boot 3, MySQL) to track project timelines, PICs, document status, and progress for the Information Systems Technology division.
- Implemented role-based access control, audit trails, Excel/CSV import-export, reporting, and data visualization to improve project accountability.
- Authored 4 Functional Specification Documents (FSDs) for internal payment systems: QRIS CPM, NFC transactions, and QRIS on EDC terminals.
- Performed pre-release bug testing on internal applications and reported defects to the IT team for resolution.

PROJECTS

Competition Management Website | Laravel, MySQL, Bootstrap *Nov 2025 – Jul 2026*
Final Project

- Built a web platform for the LKBB KOMANDO competition at SMAN Plus Provinsi Riau covering registration and competition information, with 3 user roles, PDF/Word document upload, and automated Email and Telegram notifications.
- Developed with the Prototyping methodology and validated through black-box and usability testing, documented in a 5-chapter final report.

Indonesian Review Text Summarization | Python, IndoBART: Fine-tuned IndoBART for abstractive summarization on 5,000 reviews (ROUGE-1 0.5757).
WaterMonitor | Kotlin, Android, Figma: Designed and prototyped an Android app for water quality reporting and monitoring.
Additional Web Projects

a. Qrion Landing Page (Nov – Dec 2025): built a responsive static landing page from design specifications, consistent across devices.
b. Ma'had Abu Ad Darda' Website (Aug – Dec 2024): built student registration and school profile features in a lecturer-led community service program (PKM).

CERTIFICATIONS

- BNSP Programmer Certification – National Professional Certification Agency (BNSP), 2026
- TOEIC – Score 530, 2026
- Networking & Security: MTCNA (MikroTik, 2024); Ethical Hacking Essentials & Network Defense Essentials (EC-Council, 2024); Cybersecurity Essentials (Cisco Networking Academy, 2024)

ORGANIZATIONAL EXPERIENCE

- Member, Sports & E-Sports Departments | Information Technology Student Association (ITSA), PCR *2023 – 2024*
- Security Coordinator | PMB BASKET PCR Committee *2023*
